

Once You Look, It's All You'll See.
Green Innovations in Lightweight Concrete

La Crème Exterior Ornaments Inc.
Lightweight Cement Based Architectural Accents

La Crème Ornaments is the largest manufacturer of ornamental lightweight precast concrete in North America. Known for its high-quality products and commitment to customer service, La Crème style is also characterized by versatility. The company originally drew on French architecture for design and inspiration during the early years in the ornamental plaster molding business, operating as Toronto Ornament Inc.

Inevitably our business expanded into lightweight gypsum ceiling tiles and gypsum access panels.

Today we are growing rapidly since we transitioned over into the lightweight concrete, utilizing our vast inventory of molds 2,500 styles to be exact.

La Crème Ornaments offers its clients a virtually unlimited capacity to create custom designs. To this end, the company employs an experienced team of product consultants, concrete specialists, craftsmen, and technical support personnel who are dedicated to meeting the challenges inherent in a hand-made approach, from concept to finished product.

In addition to producing products in lightweight concrete, La Crème Ornaments manufacturer's shapes in Glass Fiber Reinforced Concrete (GFRC) for example, column shafts ranging from 8" to 48" inch diameter, fluted or none fluted. In addition Corinthian, Ionic, Temple of Winds, Doric and Tuscan Capitals to fit virtually every size of shaft mentioned above.

Our reputation for diversity in design, durability of products, reliable service, and competitive pricing has made this company the choice of professionals in the design and building industries worldwide.

La Crème Exterior Ornaments Inc. retains ownership of all patterns and moulds.

Leading Supplier of Decorative Components to the Stucco, EFIS, Stone and Brick industries.
